

ERP/CRM SOLUTION ESPECIALLY FOR FORKLIFT DEALERS

eclift combines ERP and CRM system in one smart solution. Our software has been especially developed for dealers, active in the field of material handling equipment and forklifts. In addition to common merchandise management systems, eclift offers many industry specific functions. Those are important for trading forklift trucks, aerial platforms and related services.

EASY. TRANSPARENT. FAST.

Increase your company's success with eclift and optimize your daily business processes in sales, rental and service.

INCREASED EFFICIENCY

Sales, rental and service - eclift is designed to increase the efficiency of your daily work routines. Our software helps your team to gain maximum efficiency.

The eclift app supports your field service technicians planning and executing service orders. Moreover material handling equipment can be captured and processed directly at the customer's site. Your employees have access to all necessary information at all times. Benefit from higher turnover and lower costs.

CUSTOMER FEDBACK KUNDEN

„Introducing eclift, helped us to strengthen our day to day business with efficiency and transparency. Through the simple and comfortable rental calendar we create quality in managing our rental park and all the associated services.“

Torsten Franke - General Manager
GS Gabelstapler
